

Water Feature - item 9

Dear Councillors

As a relative Newcomer to Kirkby Lonsdale (with just 6 years residency) I am becoming increasingly prouder of our lovely Township...living currently at No1 Mill Brow whilst our New Build House takes shape in Low Biggins

I have noted all the very many visitors/tourists to our historical Town who wander around in constant awe of all the architectural wonders that befall them round every quaint corner

However, one feature that I believe is missing from Kirkby Lonsdale is an attractive water feature/fountain that can be found in almost every equivalent sized picturesque French and German Town and Village

Oddly enough I had never really noticed this beautiful and iconic Horse Trough that stands within the perimeter wall of St Mary's...in the centre of Kirkby Lonsdale...probably because it is always hidden by parked cars!

I would like the Council to consider moves to restore this truly beautiful piece of architecture into a working fountain/constant water (or daylight timed) that can be tastefully lit at night too!...whilst removing/disallowing parked cars from the front line of sight to ensure full visibility

I commend this initiative to the Council for your due consideration

Yours sincerely

PS I am also happy to be named as a local Trader assisting funding that will be needed to complete the stone cleaning/ plumbing/electrical work...my offer of contribution would be £500
